Motor Factory Engine Gasket Kits for Twin Cam Models

State of the art gasket material composites are included in each gasket kit. Listed below are the definitions of the gasket material used. On the back side of each gasket kit will be a content label listing all the gaskets, O-rings and seals contained in each kit. All gaskets are made in the U.S.A.

- Head gaskets are made of a high performance facing material with graphite coating on steel core with fire ring. This multi-layer fiber/metal reinforced composite head gasket delivers improved combustion sealing strength along with excellent bolt load retention and outstanding resistance to blowout. With the graphite coating anti-stick properties will not stock upon disassembly
- Covers, lifter blocks are made of Micropore
- Transmission, intake gaskets are made of Syntheseal
- Oil pumps contain Resin Reinforced / High Tensile Strength gaskets
- Each kit comes complete with all the necessary gaskets, seals, and O-rings needed to completely rebuild your engine, or just portions of your engine

Complete Engine Gasket Kits with Primary Gaskets

These complete kits also includes the components required to service the primary cover as well.

- 660491** Fits Dyna Glide models from 99-05, and Softail models from 00-06
- 660492** Fits Touring models from 99-06

Complete Engine Gasket Kits without Primary Gaskets

- 660540** Fits all Twin Cam models from 06-14 95/96"
- 660417** Fits all Twin Cam 88 models from 99-06 (except Dyna Glide models), and Dyna Glide models from 99-05

Complete Top End Gasket Kits

Includes everything necessary to rebuild the engine from the cylinder base up.

- 660416** Fits all 88" Big Twin engines from 99-06
