

Cometic EST (Extreme Sealing Technology) Gaskets

Cometic introduces EST, the ultimate in gasket sealing technology. EST's embossed stainless steel metal substrate is coated with a proprietary hi-temperature rubber material that virtually eliminates leakage when joining two metal surfaces. EST Kits contain MLS head gaskets, steel viton coated base gaskets and AFM material.

Multi-Layer Steel Head Gaskets

MLS head gaskets are simply the strongest thing around. These gaskets are made from three layers of STAINLESS STEEL. The outer layers of these gaskets are embossed which creates a heavy-duty seal between the center layer and the mating surface. This embossment seals off combustion and also alleviates the need for alignment dowel o-rings. Next the outer layers get a .001" thick coating of Viton rubber a complex fluoroelastimer coating that acts as a micro sealer. These gaskets are designed to move with the head both vertically as well as horizontally and maintain the seal. O-rings and sealers are a thing of the past with these gaskets. The all metal construction also allows for better heat transfer resulting in more even cooling and lower head temperatures. MLS type gaskets are widely used in all forms of racing (Street, Strip, Circle Track, Endurance, etc.). When installing MLS head gaskets Cometic does not recommend the use of any type sealants. As with any gasket all mating surfaces should be clean, flat and parallel. When tightening the head bolts follow the manufacturers specification for torque sequence.

- 632171** EST complete gasket kit 74" Shovel. Fits 70-84 74" & 80" Shovelhead 4-Speed
- 632172** EST complete gasket kit Shovel. Fits 80-84 Shovelhead 5-Speed FLT
- 632174** EST top end gasket kit Shovel. Fits 66-84 74" & 80" Shovel 4 or 5-Speed
- 632175** EST top end gasket kit Panhead Fits 48-65 Panhead FL, FLH
- 632176** EST big bore gasket kit Shovel. Fits 3 5/8" bore Shovels 66-84
- 632177** EST big bore gasket kit Shovel Fits 3 13/16" bore Shovels 66-84
- 632178** MLS .040" std Shovelhead gasket Fits 66-84 74" & 80" stock bore Shovelhead
- 632179** MLS .040" 3 5/8 Shovelhead gasket Fits 66-84 3 5/8" big bore Shovelheads
- 632180** Steel .020" rocker cover gasket Fits 66-84 Shovelheads
- 632181** Steel .020" base gasket-standard Shovel Fits 66-84 standard bore Shovels
- 632182** Steel .020" base gasket-big bore Shovel Fits 66-84, 3 5/8" big bore Shovelheads
