A.R.T. Hydraulic Clutch End Covers by Rivera Primo

This hi-tech 4-speed kick start hydraulic end cover is precision machined from billet aluminum. These beauties have been engineered to offer smooth and positive clutch control under all conditions. They're all fitted with honed steel cylinders and have a piston bore of 1 3/8". Available in a polished finish, covers will require purchase of a 5/8" bore handlebar master cylinder, 3/8-24 (10mm) banjo bolt & the appropriate hydraulic clutch line.

KickStart Kits for 5-Speed Big Twins

Complete heavy-duty kickstart kits for 5-speed Big Twin models 82-99. Features include:

- Reinforced aluminum end cover for strength.
- CNC machined billet aluminum transmission adapter plate for a precise fit.
- Chrome top pivot kick arm with non-slip flat rubber pedal.
- Designed with many standard kickstart components for easy maintenance.

Available with chrome or polished cover, each kit includes mainshaft extension, gears and other necessary components for bolt-on installation on Big Twin 5-speed models 87-89.

Note: Installation on 82-86 models with old style clutch actuator requires update to ball-and-ramp style clutch cable* and releasing kit* (CC #58591). FXR models may require FXST cable. Installation on late 1990-up models requires (CC #070009) clutch adjusting screw. These items must be purchased separately.

Note: May require modification of exhaust system to allow proper cover fit.

NOT for RevTech transmissions
