**Custom Chrome Rims**

These 40-hole drop center rims are formed from a high-strength steel alloy and given a coating of show-quality chrome that will stay looking great for years. They're the finest stock replacement rims available anywhere. Lace them with our twisted spokes for a truly custom look!

**56410** 16" x 3.00" for use with steel hubs used from 81-96 (replaces OEM 43085-81) MCV

**08776** 18" x 5.75" for custom applications

Note: The CC #56410 16" x 3.00" rim requires the use of a metal center valve tube (CC #1571517).

**Chrome Front Rims**

**19" Rim**  
Exclusive to Custom Chrome. This show-chromed 19" x 2.50" Rolled-Edge drop center rim is styled like the classic drop center, and the rolled edge gives your front wheel additional strength. Another first for this rim is the duplication of the OEM spoke dimple pattern which permits effortless lacing to disc wheel hubs.

**15940** Replaces OEM 43018-73

**21" Rim**

This show chrome drop center rim with a fully-rolled edge is the same size (21" x 2.15") and has the same spoke pattern as the Original Equipment 21" rim.

**15942** Replaces OEM 43662-80B

**Chrome Hubs for Twin Cam Models**

The same hubs used in all of our quality wheel assemblies. Come complete with all wheel spacers and the sealed bearings already installed.

**42496** Fits front of Sportster and FXR models 00-07 and Dyna Glide models 00-03 with 39mm forks and 3/4" axle

**42497** Fits front of single disc Softail models from 00-06 and Dyna Wide Glide models from 00-05

**42499** Fits the front of all dual disc Touring models from 00-07

**42498** Fits the rear of all Big Twin and Sportster models from 00-07 (except 02-00 Touring models)

**600829** Rear hub chrome 18 x 5,5 for models 00-up with 3/4" axle 71/51 mm€

**40-Spoke Extra-Wide Offset Dual Flange Rear Hubs**

Pulley side is offset .875" further out than standard 73-85-style hubs. Eliminates the need for pulley spacers on most applications, and places the bearings farther apart for greater stability. Helps to eliminate bent axles often associated with using standard hubs for wide applications using large pulley spacers.
