WHEELS, TIRES & BRAKES

13

'The Dunlop Harley-Davidson Tire Series' D401 Elite SIT Tires

The only tire approved by Harley-Davidson for both its sport (except for those fitted with the Dunlop K591 as Original Equipment) and cruiser models. It employs an advanced tread pattern and compound for outstanding grip in wet or dry weather while delivering long life. Features serrated sidewalls with Harley-Davidson and Dunlop imprinted in 'Raised Black Letters.'

Front Tires

1366143 90/90H x 19" Raised black letter

1362025 100/90H x 19" Raised black letter

Rear Tires

1362191 130/90H x 16" Raised black letter

1366144 150/80HB x 16" Raised black letter

1361275 200/55VR x 17" Raised black letter

'The Dunlop Harley-Davidson Tire Series' K591 Elite Tires

Originally designed for racing but now incorporating refinements to meet the demands of sport and sport-touring enthusiasts. The K591 is approved for sport models and carries a V-speed rating. The directional tread pattern with improved tread compounds delivers optimum grip in wet or dry weather for confident cornering as well as long life. Features serrated sidewalls with Dunlop and Harley-Davidson imprinted in 'Raised Black Letters.'

Note: Check clearances when going larger than stock sizes.

Front Tire

1361914 100/90V x 19" Raised black letter

Rear Tires

1361861 130/90V x 16" Raised black letter

1362329 MT90HB x 16" Narrow whitewall

1366142 MT90HB x 16" Wide whitewall

★ IMPORTANT DUNLOP SAFETY INFORMATION

- Never mix radials with non radials. Never fit a tube in a radial tire, nor fit a radial on a rim requiring a tube.
- The letters S, H, V and Z included in the size markings of some street tires are speed ratings recognized by the European Tire and Rim Organization and Japanese Industry Standard. The ratings are assigned based upon controlled indoor wheel testing. The manufacturer does not recommend the use of any tire in excess of legal speed limits.
- Inflated section width is not the tread width. Sectional width is the width of the tire measured from sidewall to sidewall at the widest point.
- Metric sized sport tires do not have the same load capacity as alpha-numeric touring tires and should not be used for the same service.
