

440 Series Shocks by Progressive Suspension

Every product line has a "best of the best" and the PSI 440 Series shocks are just that. We wrap our proven progressive rate spring around a state of the art damper and top it off with machined aluminum end caps. A top mount threaded preload adjuster allows for fine tuning with a simple twist of the cap and the 440 Series is available in 2 finishes and multiple spring rates as well as the ideal stock or lowered length for your bike. Limited lifetime warranty.

FLH/FLT Models

Standard Spring Shocks

- 690145** 11.5" fits 91-Up

412 Cruise Series Shocks by Progressive Suspension

The 412 Cruise is the perfect balance of lowered stance and ride quality. By combining a flat-wire spring with a progressive main spring the 12.5" shock sits like 11.5" units under the weight of the bike, yet utilize the full stroke as terrain demands it. The result is a lowered shock that rides like a traditional height unit.

- Five position preload adjuster
- Gas charged damper
- Fits 77-13 Sportster applications
- Black or chrome main spring

944 Ultra Touring Series Shocks by Progressive Suspension

Specifically designed to deliver a comfortable ride at a 1" lowered stance. Built around Progressive's newest Frequency Sensing Technology (FST) allows the shocks to sense the frequency of a bump and automatically adjust dampening for a superior ride. The Ultra Touring Shocks utilize all the suspension travel provided by these 13" eye to eye units but provide a 1" lowered ride height with the use of a Progressive rate main spring specifically designed for Touring models. The unique Ultra Touring spring combination not only delivers a lowered ride height while it's being ridden, but also while it's on the kickstand. These shocks are High Pressure gas charged for consistent performance and come in a gloss black finish.
