422 Heavy-Duty Adjustable Ride Height Shocks for Softail Models by Progressive Suspension

Riding 2-up with stuffed saddlebags can quickly overwhelm your Softails suspension. Progressive has solved this problem by adding a higher rate spring to this already fully adjustable shock, providing better load and bottoming control. Combine that with variable ride height and tunable spring preload to setup your bike to fit your riding style. The 422 series shocks are based on a monotube damper system using and internal nitrogen charge, they are designed to eliminate oil cavitation and help create a consistent ride. Available in chrome finish only. Sold in pairs.

690184 Fits all models from 89-99

690185 Fits all models from 00-Up

Chrome HD Adjustable Ride Height Shocks for Softail Models by Progressive Suspension

High performance shocks to replace the Original Equipment units on Softail models from 89-12. They feature adjustable mounts that permit the bike to be lowered up to two full inches from stock ride height. Improved compression and rebound damping give you greater control with less bottoming out and the spring preload is adjustable. Available in chrome finish only. Sold in pairs.

680004 Fits all models from 89-99

680005 Fits all models from 00-Up

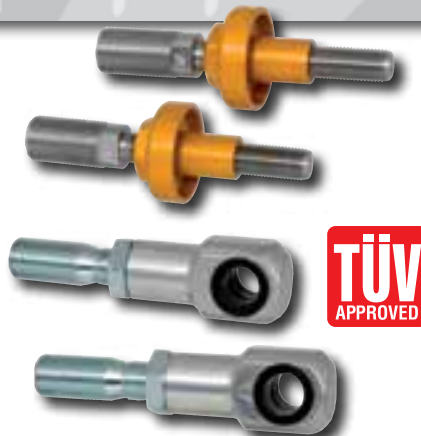

Reinforced Progressive Spring Kit for Softail Models by Eibach

German precision-crafted replacement progressive springs from Eibach, one of the leading spring manufacturers in Europe and the USA. Available in three stages for demanding riders. Simple installation, just replace the OEM part with them. The heavy-duty version with 1250-1400 lbs/inch rate provides an excellent ride for lowered bikes. The typical bottoming out when you ride with two persons or heavy luggage is history. Sold in pairs.

687087 Standard rate (950-1100 lbs/inch)

687088 Heavy rate (1100-1250 lbs/inch)

687089 Heavy-duty rate (1250-1400 lbs/inch)

WHITE
BROTHERS

White Bros. 'Adjust-A-Ride' Kits for Softail Models

Fully adjustable versions of the popular 'Lowboy' lowering kits which don't require any cutting, grinding, or irreversible modifications and can be installed in an hour. Permits the ride height to be adjusted up to 2" lower or raised from the stock height by 1/2" in minutes with a 3/4" wrench. They feature sealed heim joint bearings that require very little maintenance.

Fits all Softail Models from 00-13

07895 Plain

for reference only

Rear Lowering Kits by LA Choppers

These bolt-on shock mounts move the shock mounting points further back and down, lowering the rear of your bike with no loss of travel. Installation is easy, with no permanent modifications to your bike. All kits come in a black anodized finish and include instructions and necessary hardware.

For Sportster Models

631405 Fits all models from 00-04 (except Hugger, 883 & 1200 Custom, 883L, 1200L, 1200N and XL5 models) lowers bike approximately 1"

Note: These lowering kits are not recommended to be installed on motorcycles equipped with lowered shocks. Lowering your motorcycle reduces cornering clearance.
