★SOFTAIL★

Narrow Front Fender for FL Models

Custom, unpainted steel narrow FXWG-style front fender for all 4-speed FL model forks from 49-84. Includes chrome mounting brackets, the fender profile is designed to clear 18", 19" and 21" tires.

26159 Unpainted (7 3/4"-wide)

Custom Fender for Wide Glide Front Ends

A bolt-on version that completely replaces the stock front fender on Dyna Wide Glide, Softail and 4-speed FXWG models from 80-06 (except Heritage Softail, Fat Boy and Springer Softail models). Styled with an added accent bead around its entire edge. These fenders include polished aluminum spacer blocks, and fit with 19" or 21" wheels only.

13183 6" wide

Custom Skirted Fender with Flip

Based loosely on the skirted early K model front fender, this timeless classic has been updated to fit all 35mm and 39mm front forks from 73-13.

13196 Unpainted (5 3/4" wide)

Note: Fender should not be used on bikes equipped with highway bars.

One-Piece Rear Fenders for FL Models

Accurate reproductions of the one-piece rear fenders on 4-speed FL models from 80-84. One version is smooth with no taillight or turn signal mounts, and the other has the 73-98 taillight mount (but no turn signal mounts). Fender strut mounting holes are already drilled.

- 13189** With no taillight mount
- 13212** With 73-98 taillight mount but no indentations for the turn signal mounting bar

Custom Rear Fenders for Softail Models

Sold exclusively by Custom Chrome, and have an early-style 'reveal' stamped in the rear tips. Installation requires the removal of 5" from the struts. Two decorative end caps are supplied to finish off the shortened struts. Fit all 5-speed Softail models from 86-99.

13254 With no taillight mount

Note: 97-10 models require modification and/or relocation of OEM fuse box. The stock turn signals must be relocated, and the saddlebags on FLSTC models cannot be reinstalled due to the shortened fender struts.

Custom Rear Fender for Softail Models

A duplicate of the fenders fitted to Heritage Softail models, but is smooth with only fender strut holes in it for custom taillights. It's ready to use as a replacement item or for FX Softail models converting to full fenders.

Note: 97 and newer models require modification and/or relocation of OEM fuse box

13211 Fits all Softail models from 84-96 as a custom fender

Replacement Rear Fenders for Softail Models

Accurate reproductions of their Original Equipment counterparts. They're pre-drilled for the fender struts and license plate mount, and have the taillight mount in place. They fit all Softail models from 84-99. Available with or without provisions for the turn signal bar.

- 78345** Without mounting holes for turn signal bar (repl. OEM 59596-89)
- 78347** With mounting holes for turn signal bar (repl. OEM 59126-86)
- 240469** Vintage rear fender without taillight and turn signal mounts

Custom Fat Bob Rear Fenders

Original style universal and custom application fenders. Available with left or right-hand chain cutaway without taillight mount. Fenders measure approx. 38"-long, 7"-wide and 5 1/2"-deep. Fenders are unpainted.

Left Chain Cutaway

Fits all Big Twin models and bikes with the chain on the left side.

13178 Without taillight mount

Right Chain Cutaway

Fits Sportster models in custom frames and bikes with the chain on the right side.

13179 Without taillight mount
