Raw steel pre-formed, changes the look of your bike dramatically just by welding on these two stylish tips without the expense of a new stretched gas tank.

**86665** For 3.5 gallon split tanks
**86666** For 5 gallon split tanks
**86676** For Twin Cam Softail tanks
**696276** New system tank extensions for Twin Cam Softail models

COMETE MOTOCYCLES

### Tank-Lift for Sportster by Comete Motorcycles

Lift the front of your tank for a unique look and improved airflow on the engine. Install on the tank without any modification. Brackets powder coated and Stainless steel hardware included. For All Harley Davidson Sportster 95-. With Installation manual.

***Tank-Lift brackets for All Sportster 95-14***

**619663** Tank lift 1.5"
**619664** Tank lift 2"
**619665** Tank lift 2.5"
**619666** Tank lift 3"

LOWBROW CUSTOMS
Where the action is!

### Lowbrow Fuel Reserve Bottle

Holds 30 fl. oz. (887 ml) of fuel, some extra miles to get you off of the side of the road and to a gas station. These are ultra light, seamless extruded aluminum. Lacquered interior for superior durability and protection. These are NOT water bottles! For go juice only. O-ring sealed cap.

**619840** 30 fl oz fuel bottle

### Wagner Fuel Tank Sealing

Fuel tank sealing set is a special treatment to stop corrosion inside of fuel tanks and to protect the fuel tank from further corrosion on a long-term basis. The fuel tank sealing set consists of a rust exchanger and a single-component resin for longterm coating.

***Rust Exchanger:***

- Stops corrosion immediately, total derusting no longer necessary
- Additionally converts rust into a non-corrosive metal compound.
- The rust exchanger is a very thin liquid and thus gets through all pores.
- It forms a violet-black layer, an ideal condition for the following treatment with the sealing.
- It saves times and money, neither intensive derusting, nor dangerous sandblasting or undercoating necessary.
- It may only be applied on dry, oil and grease-free surfaces
- Easy application, ready for use, protect from frost.
- Content 250 ml sufficient for tank treatments up to 80 ltrs. tank volume (or multiple applications on smaller tanks).

***Single-Component Sealing:***

- Forms a fuel and acid-resistant longterm coating.
- Single-component resin, thus universal application.
- Multiple applications possible.
- Economic in use.
- Content 500ml, sufficient for tank treatments up to 80 ltrs. tank volume (multiple applications possible on smaller tanks)
