

**PaintSaver 'Plus' Filler Neck Protectors**

Made by Carlini Design for late 96-05 gas tanks that won't accept the original model. The polished stainless ring installs with silicone adhesive. Protects paint from chipping and damage from fuel and fuel vapors getting under the paint. Sold each.

**15582** Fits models from late 96-14

Note: In mid-96 the OEM tank design changed. The gas tank bung on these later models DOES NOT have any welding bead above the sheet metal surface of the tank.

**Original PaintSaver 'Plus'**

Incorporates a nitrile rubber seal that is permanently vulcanized to the bottom of a thick polished stainless steel beauty ring. Sold each.

**25582** Fits screw-top gas tanks on most models from 82-E96

**25589** Fits cam-style fuel tanks used before 82

**Flush Mount Gas Caps by Kuryakyn**

These slick, flush mount gas caps have the high-tech look of aviation-style fuel fillers. The built in trim ring protects the painted surface around the filler opening from dings and gas stains. A keyed entry system permits their ultra thin profile and prevents tampering. Installation requires no cutting and the "key" is included. Stock gaskets must be reused on models from late 96-14.

**48266** Vented, for right-side tanks

**48267** Non-vented, for left-side tanks

**260252** Replacement key

**600244**

**600241**

**600247**

**600240**

**Screw-In Style 'Pop-Up' Gas Caps**

Give your gas tank a custom look without having to cut, weld or re-paint! These caps simply screw into your existing tank bungs. They fit in nearly flush when closed; opens easily with just a 1/4 turn of the center of the cap. Billet aluminum construction with either a chrome-plated or wrinkle black finish. Available for a wide variety of models & years.

**Fits 96-14 Models**

**600240** Pop-Up gas cap set includes one vented & one 'dummy' cap for 96-14 models, chrome

**600247** Pop-Up Gas cap set includes one vented & one 'dummy' cap for 96-14 models, wrinkle black
