

Billet Re-Useable Oil Filters by Pegasus Performance

Finally a re-useable oil filter for your Twin Cam or EVO engines. CNC-Machined from billet aluminum and available in either a Polished, Satin, Black anodized, and Black anodized with highlighted fins. It has a special removable/washable micronic 304 Stainless Steel mesh filter and 3 high-power magnets grab any metal particles before they even get to the filter. This filter also increases overall horsepower by 3%-5% by keeping the engine cooler and allowing the oil to flow more freely, which reduces oil temperature as well as oil levels in the engines sump thereby reducing oil/flywheel obstruction. Bottom line this oil filter, filters better than any paper filter on the market, never needs to be replaced, and is an environmentally green product. Fits all Twin Cam and Evolution engines. Made in the USA.

"Vendetta" Oil Filter Mount from Crime Scene Choppers

Through 64, Harley had a cool external oil filter mounted on their Big Twins. This is Crime Scene Choppers' interpretation of that filter. They kept the same orientation of the bosses for the lines, added some tasty fins on top to match their other products and changed over to a spin-on filter. The backside has two 3/8" tapped holes, and can be mounted in the stock location or hung out in the wind however you like! The "Vendetta" filter mount is made of aluminum with a fine satin finish to match the other Crime Scene products, and comes with a chromed K&N filter and hose barbs. You can use either the short filter as shown, or a long style filter. Replacement filters are available through us, and are stock-style late model HD filters. Made in USA.

Generator Oil Filter Adapter by Custom Design Studios

This adapter allows you to install an oil filter in place of the generator on models that have an alternator left side case (Knuckle, Shovel and Pan) This adapter has a 360° indexing design that makes routing your oil lines a lot easier, it is only 5/8" so you can install a long filter with no clearance issues. Comes in a raw aluminum finish.
632916 Aluminum oil filter adapter

Generator Oil Filter Adapter

This adaptor allows you to install an oil filter in place of the generator on 36-69 motors as well as our Pandemonium or S&S Shovelhead engines with generator/alternator bottoms. Use OEM 63796-77A or equivalent aftermarket oil filter. Chrome finish.
