

U.S. Patent #4,848,154

SpeedoTach 2 for Fat Bob Dashes

Our new and improved combination speedometer and tachometer for all large Fat Bob dashes from 47-90. The precision built 120MPH speedometer is combined with a solid state 6000RPM electronic tachometer that accurately tracks engine speed by reading the coil output. Both instruments are designed to withstand vibration and maintain accuracy throughout all speed ranges, and now the wiring attaches to threaded posts on the back of the gauge. Standard features include a glass lens, new graphics, a wiring harness and complete mounting kit (CC #25965).

27981 2:1 ratio for FL models with transmission speedometer drives from 47-67, and Sportster, FX and FXR models with front wheel speedometer drives from 73-90 (except Softail and 4-speed FXWG models). Requires a speedometer cable with a 5/8"-18 threaded nut

Custom Front Wheel Speedometer Cables
Unique black vinyl cables that permit you to combine a CC #27981 speedometer/tachometer with front wheel drive units. Cables have a 5/8"-18 large coarse thread on the speedometer end.

19081 38 1/2"-long

19095 Black vinyl, 42 1/2"-long

Note: CC #27981 speedometers may be installed on models from 91-94 if the self-cancelling turn signal feature is forfeited.

Inferno Custom Face Speedometers

The hot Inferno flames in chrome right on the speedo face. 110 MPH speedometer with resettable trip odometer includes mounting kit and rubber dampener.

27931 1:1 ratio for 4-speed FL and FX models with transmission-driven speedometers from 68-83. Requires a speedometer cable with a 5/8"-18 threaded nut

27935 2240:60 ratio for all Softail and 4-speed FXWG models from 84-90, and 4-speed FL models with front wheel speedometer drives from 81-84. Requires a speedometer cable with a 12mm threaded nut

27937 2240:60 ratio with reed switch for all Softail models from 91-95 with front wheel speedometer drives and self-cancelling turn signals. Requires a speedometer cable with a 12mm threaded nut

Dash and Speedometer Kits with Dashplates

Complete kits with a speedometer, dash, trim, dashplate with light sockets, and ignition switch for Softail and 4-speed FL and FX models from 36-95. Offered in 1:1 and 2:1 ratios for use with front wheel or transmission speedometer drives.

Note: These kits may be installed on models 91-95 if the self-cancelling turn signal feature is forfeited.

91963 3-light dash with 2:1 ratio speedometer

Speedometer/Tachometer

Combination instruments feature an easy to read 120 MPH speedo face with a solid state electronic tachometer. Tachometer reads RPM from 12 volt coil output. Single fire ignitions will require tach adapter. Sold under license.

310418 2240:60 ratio. Fits FL models 81-84, FXWG 84-86 and Softail models 84-95* with front wheel drive unit. 12mm cable fitting

Police Special Speedometers

These quality units are available in 1:1 and 2:1 drive ratios. Speedometers come with rubber isolation kit and Late-Style threaded reset knob stud. When used with early steel dashes, antique reset knob is required. Reset knobs sold separately.

1:1 Ratio Speedometers (1000rpm = 60mph)

Fits FL models 62-80, FX models 71-72 and FXWG 80-83 with transmission drive unit. 5/8"-18 cable fitting.

310392 Police special face

2:1 Ratio Speedometers (2000rpm = 60mph)

Fits FL models 47-61 with transmission drive unit and FX, or custom models 73-90 with front wheel drive unit. 5/8"-18 cable fitting.

310393 Police special face
