688074 Black, fits plates measuring 7" wide x 4"-tall whose hole dimensions are 5 3/4 x 2 3/4

Colony Chrome Mounting Hardware Kit

Features rubber insulators to eliminate vibration.

36024 Stove bolt-style with acorn nuts for all slotted brackets

Curved 'Laydown' License Plate Mount

Curvaceous cousin to our popular CC #13199, the original laydown license mount. Not only can this mount be angled to the profile of the fender, it also follows the radius, for a tighter, cleaner look. Fits most models. Includes hardware and rubber isolation spacers.

14205 Chrome curved 'laydown' license plate bracket

660750 Black curved 'laydown' license plate bracket

AVAILABLE IN BLACK

'Laydown' License Plate Mounts

Close-fitting, one-piece chrome-plated and black license plate mounts which can be used to replace the multi-piece license plate mount and bracket on the rear fender. Two rubber spacers isolate the license plate from vibration, and permit the mount to be tailored to the profile of the fender for a much tighter, cleaner look. They mount directly to the standard hole pattern on all rear fenders (except Fat Bob) from 55-Up and come complete with mounting hardware.

13199 Chrome original-style

660751 Black original-style

14199 Chrome Pyramid-style

Replacement Spacers

13299 Set of replacement rubber isolation spacers. One each flat and wedge style

Low Down Deluxe License Plate Mounting Bracket by AutoGem

This innovative design allows you to relocate your license plate bracket below your tail-light, and have the option to retain your stock turn signal light bar. Fits Touring models from 91-03, 4-speed FL models from 78-84, and FL Softail models from 86-07 (except FLSTS/FLSTF models).
