### Dogeyes by Radiantz

Dogeyes are a multi-color LED Clusters used for rear turn signal applications. The clusters are 1.85" in diameter and contain 48 super bright LEDs. The outer ring contains Amber LEDs while all inner LEDs are dual intensity Red. The Amber LEDs are connected to an 1156 base while the dual intensity Red LEDs is connected to 3' wire pigtails. These clusters can be wired as: Red low intensity. Running light, Red High Intensity Brake Light, Amber. High Intensity Turn Signals, this allows your rear turn signals to be converted from simple turn signals to. Dynamic running, brake, and turns signals, all in one unit. Installation is very simple, just plug the 1156 base to the stock turn signal housing receptacle, run the orange running light wire and the red brake light wires through the stock turn signal stems back to the taillight, connect the orange wire to the stock running light and the red wire to the stock brake light wire.Pairs.
