

### Radiantz LED

#### Chameleonz by Radiantz

Why have just one color of LED accent lights on your motorcycle?

#### Now you can choose many colors:

Red, Green, Blue, Purple, White, Teal, or Amber. If you want to have all colors on with a push of a button you can have colors auto rotate. With this feature the LEDs slowly fade from one color to the next! Love green lights but they are not legal in your state? No problem, just hit the button on the Chameleonz Controlz to change to another color for your ride. After you stop and park your bike in front of your favorite hang out, change the lights back to green with the Chameleonz Controlz. Our LEVER NUTS can connect 1-15 wires together; so you can connect up to 15 Chameleonz pods with no soldering and no special tools. Need to add a new pod? No problem, just lift the lever, insert the new wire, and click. New Pods can be added in less than 5 minutes. Each Chameleonz pod comes pre-taped with 3M double sided tape and 72" of wire with a black shrink tube for a truly simple but custom installation. Sold each

- 605105** 3" extension wire
- 605108** 12" extension wire

#### Küryakyn Lighted Fairing Trim for Road Glide Models

What do a supermodel & a Road Glide fairing have in common? They both look terrific when their soft contours are highlighted! OK, a hot bikini will probably get more looks, but this new Fairing Trim does make the most out of the sleek lines of this bike. This curvaceous chrome molding installs easily with high-strength peel-&-stick adhesive, & the integrated L.E.D. supplemental run/turn lights simply plug into existing wiring.

**605203** Lighted fairing trim for all 98-13 Road Glides
