Accel 'U-Groove' Spark Plugs

The ground electrode builds the spark to a "ball of fire" flame providing a smoother idle and better combustion. Five-rib insulator prevents flash-over and misfire, copper glass inner seal and electric heat seal prevent combustion leakage and fused copper/nickel center electrode has a wide heat range.

Champion Copper Plus Spark Plugs

Features include a wider-base insulator which provides an easier path to speed the transfer of heat and a longer insulator nose containing a center electrode of pure copper inside of chrome-nickel to transfer heat between firings and help resist fouling.
