Khrome Werks 5-4 Wiring Connector

Plug and play wiring harnesses to convert the 5-wire (separate turn signals and stop/tail light) H-D systems to 4-wire (combination stop/tail/turn signal lights) lighting systems on some accessory trailers. Both kits have foreign and domestic content. With male/female plugs to connect into the H-D wiring harness, 60" long 4-wire harness with 4 wire flat plug. The module features an adhesive tape for mounting and a screw boss for optional mounting.

631567 5-4 Wiring Converter With Connector Standard. This harness fits FLT/HT, FLHR Touring models 97- and FLSTC models with 8 pin Amp multi-lock connectors.
