

Handlebar Bracket for Smart Phones or Navigation Systems by CRC

Vibration resistant bracket for navigation systems or PDA's. The units are securely fastened in the bracket which mounts to the top clamp of the handlebar risers. The angle is adjustable for a better view under difficult daylight situations. Fits models with 70 mm or 120 mm hole-to-hole distance of the riser bolts. A bracket for 7/8, 1" or 1 1/4" handlebars is also available. The backside of the bracket has a vibration dampening unit which attaches to the Riser or handlebar clamp to avoid damage on the units. Weatherproof covers are available separately in several sizes matching to the GPS unit used.. Available in chromed or black version.
