

Crane Hydraulic Kits for Shovelheads

These heat treated steel tappet bodies feature relocated pushrod seat heights, resulting in a weight savings of up to 33% less than stock and improved valve train geometry to reduce tappet block wear. Each kit includes a matched set of 4 roller tappet assemblies with hydraulic units and Crane's adjustable chromemoly steel pushrods to assure outstanding performance and durability. Fits stock Shovelhead engines from 66-84.

010539 Stock tappets and pushrods

Vulcan Engineering Adjustable Pushrod

668134 Shovelhead (OEM 17904-66)

668135 Panhead

Custom Chrome Pushrod Cover kits for Twin Cams

Features long pushrod clips for easy access and removal. Great for adjustable and 'time saver' type pushrods. Kit includes pushrod tubes, washers, covers, clips and O-rings. Fits Twin Cam models 99-14

637067

Hi-Performance Solid Lifter Kits

These kits install the adjusters into the lifter bodies in a manner which increases the stability of the pushrods at greater angles. The standard kit includes 1/2"-diameter 6061-T6 aluminum push rods, while the deluxe kit features pushrods made of 7/16"-diameter 4130 seamless chrome moly tubing. The pushrods are long enough for engines with stroker cylinders, and all wear surfaces are hardened for durability. Fits Shovel head motors from 66-84.

24050 Complete kit with 7/16" chromemoly pushrods

24051 Complete kit with 1/2" aluminum pushrods

24052 Replacement 5/16"-32 split nuts for the above kits (pack of 10)

Adjustable Hydraulic Lifter Conversion Kit

Kit will correct all problems associated with hydraulic lifters and reduce valve train weight.

36034 Fits Panheads from 53-65

36033 Fits Shovelheads from 66-84

Replacement Pushrod Sets

36032 Fits Panheads from 53-65

Chrome Custom Pushrod Cover Kits

Fit all Evolution Big Twin models from 84-99.

37064 Complete kit with all pushrod tubes, washers, covers, clips and O-rings
