### Chrome Panhead 'D' Rings

Thick aluminum 'D' rings with a show-chrome finish for all Original Equipment pan covers as well as any of the aftermarket offerings. Helps prevent oil leaks around the pan gasket. Comes complete with chrome sockethead capscrews.

**12270** 'D' rings and screws

### Vulcan Engineering Billet Aluminum Pan Cover Set

Machined from 6061 Billet Aluminum. Ideal for high lift cams that need extra clearance. Reduces top end noise, eliminates valve cover oil leaks and dissipates heat faster than steel stock covers.

**668138** 48-65 Gloss Black Powder Coat

**668143** 48-65 Chrome Finish

### Finned Dishpan Rocker Covers from Custom Cycle Engineering

The original finned dishpan rocker covers were designed and manufactured by Randy Smith and Custom Cycle Engineering back in 1968, and they've brought them back just for us old school fanatics! Designed to eliminate oil seepage associated with the stock Panhead rocker box covers, these covers also dampen noise and a cooler running motor. These unique custom rocker covers are made from the original tooling that Randy designed, and even cast from A 356-T6 aluminum at the same foundry. Sold in "as cast" finish. These covers match great with the Finned primary covers also offered in this Handbook. Made in USA by the gang at Custom Cycle Engineering.

**632740** Finned Dishpan Rocker Cover set for Panheads
