

Goodridge 'Econoline' Brake Line Kits

These brake line kits feature clear coated stainless braided hose and chrome-plated fittings. The clear cover on the hose is abrasion resistant, while the PTFE liner is an inert material that is compatible with all brake and clutch fluids. The chrome-plated fittings are guaranteed not to peel, chip, fade, or leak under normal usage. The kits ship complete with bolts and washers in clamshell packaging with installation instructions. With applications to fit virtually every model on the road, you can pay more for brake lines, but you cannot buy a higher quality kit.
