

**Swedish Style Sportster Frames by Paughco**

Got a Sportster engine you wish you could put in a cool chopper type frame? These "Swedish" style rigid frames feature 35 degree rake, 3" stretch out and 6" stretch up.

Set up for final chain or belt drive and disc brakes. Accept Big Twin style 1" neck stems which let you choose from our wide variety of springers, girders or glide style front ends. No tank mounts so you can use any of our custom gas tanks. Standard width frames accept 130 series tires using a conventional rear belt drive. Wide frame accepts 180 series tires with conventional rear belt drive or 200 series with chain drive. Axles must be purchased separately. Must use #632247 oil tank with these frames and either #632249 battery box kit for kickstart applications or #632250 for electric start applications. Made in USA by Paughco.

- 632235** Swedish style frame. Standard width. Sportster engines 86-03
- 632237** Axle for standard width Swedish & Chopper style XL frames
