Flatside Gas Tanks with Screw-Type Gas Caps

Designed to accept 82-95 screw in caps. Each tank is formed on all-new tooling to ensure quality. Tanks are designed to work with stock and most aftermarket frames with flatside brackets and single large diameter instruments, dashes, trim panels and 13/16" petcocks. Fit Softail models from 84-99 and most aftermarket frames with mounts for flatside tanks.

Gas caps must be purchased separately.

- 15297** 3.5 gallon
- 15298** 5 gallon
- 15294** 6 gallon

Note: Due to the slightly different contour of the 6-gallon tanks, flexible steel, leather or plastic tank panels should be used. All fuel tanks must be test fitted, pressure tested, and pre-sealed before painting. Tanks shown painted for illustration purpose only, tanks require finish body work.

Fat Bob Gas Tank for FXR Models

Classic Fat Bob look for all FXR models from 82-99. It has the appearance of split tanks, but is really a one piece welded tank with twin screw type filler necks, and 13/16" external thread gas valve fitting. Bolts directly to the stock mounts and accepts all FL-style dash assemblies (except Cateye) when the appropriate dash base is used. Included with each tank is a CC #19095 superflex speedo cable and a chrome tank divider panel. The tanks are even equipped with internal emission control system connections, for use on vehicles WITH fuel tank emission devices (i.e., California models).

- 25551** 4-gallon Fat Bob gas tank for FXR models

Note: CC #25551 tanks require removal of solder from vent tube prior to installation on vehicle when connecting fuel tank emissions control devices.
