

MMB®

MMB 'Basic' Electronic Speedometers

Latest technology, made in Europe. Now available with step motor to fit all sensors. Comes without bracket and cup which must be ordered separately. The smallest speedometers (48mm) on the market with analog display for speed readout and an LCD display to display time, total or trip distance. Available with blue or white illumination on your choice of black or white faces, and simple to operate. To be used in OEM applications as well as in aftermarket installations (with RevTech 5-speed and 6-speed transmissions).

MMB®

80 mm, 12-Volt Electronic Speedometers

- Compact and stylish at only 3.15" in diameter (80mm)
- Now with stepmotor for all sensors
- Illumination bulb and single line display for trip meter
- Freely programmable on every vehicle
- For hall effect sensors with npn-output and for debounced reed sensors
