

Custom Heated Hand Grips by Avon Performance

Avon has teamed up with Symtec, manufacturer of the popular Heat Demon heaters. The Heat Demons are inserted into the grip during the assembly process, and will put the heat right where the rider wants it, in the palm of his/her hands. The controller has (4) heat settings indicated by small LED lights. Most designs are finished with billet collars & end caps. Throttle sleeve included. Fits all single or dual cable applications (except those with handlebar air reservoirs) from 73-Up including 'Throttle-By-Wire' models.

Heated grips for all 73-Up single and dual cable applications (except 08-Up Touring models)
