

Billet Aluminum Coil Brackets and Mounts by MW

These stylish German-made billet coil brackets are CNC-machined and then given a highly-polished finish and furnished with stainless steel mounting hardware. They may be combined with one of the billet aluminum top motor mounts made by MW, or a lower cost alternative is to combine them with a CC #86290 adapter which permits them to be installed on any of the two-piece Original Equipment motor mounts used from 91-10. If desired, Original Equipment-style ignition switches can be installed on some of the coil mounts.

Fit Softtail Models from 84-99

- 86273** Standard
- 86278** Super Light

Fit Sportster Models from 86-03

- 86272** Standard
- 86276** Super Light
- 86288** Spacer to provide necessary clearance between the engine and the coil or accessory ignition switch brackets when installed

Ignition Switch Mounting Bracket

Used to install an ignition switch between the cylinders when your coils are mounted elsewhere. Accepts most Original Equipment and aftermarket ignition switches.

- 86289** Rubber isolator mount for 80-08 Touring and FXR models
